AUTHOR INDEX

VOLUME 18 NUMBERS 1–6

A

Ackerman, Margaret E., William L. Redd, Calvin D. Tormanen, Joel E. Hardgrave, and **Terence J. Scallen.** The quantitative assay of 3-hydroxy-3-methylglutaryl coenzyme A reductase: comparison of a thin-layer chromatographic assay with a rapid chloroform extraction assay 408

Adolphson, Janet L. See *Albers et al.* 331

Albers, John J., Janet L. Adolphson, and **William R. Hazzard.** Radioimmunoassay of human plasma Lp(a) *lipoprotein* 331

Albone, Eric S., and **Truls O. Grönneberg.** Lipids of the anal sac secretions of the red fox, *Vulpes vulpes*, and of the lion, *Panthera leo* 474

Allan, Robert N. See *Ng, Allan, and Hofmann* 753

———. See *van Berge Henegouwen et al.* 118

Allen, C. E. See *Etherton, Thompson, and Allen* 552

———. See *Hood and Allen* 275

Almé, B., B. Bremmelgaard, J. Sjövall, and **P. Thomassen.** Analysis of metabolic profiles of bile acids in urine using a lipophilic anion exchanger and computerized gas–liquid chromatography–mass spectrometry. 339

Angelin, Bo. See *Gustafsson et al.* 717

Augustin, Jan. See *Boberg et al.* 544

B

Baginsky, Marietta L., and **W. Virgil Brown.** Differential characteristics of purified hepatic triglyceride lipase and lipoprotein lipase from human postheparin plasma 423

———. See *Boberg et al.* 544

Bailey, J. Martyn, and **Jiunn-Der Wu.** Lipid metabolism in cultured cells XVI. Lipoprotein binding and HMG CoA reductase levels in normal and tumor virus-transformed human fibroblasts 512

Bennett Clark, Susanne, and **Kaare R. Norum.** The lecithin cholesterol acyl transferase activity of rat intestinal lymph 293

Bensadoun, Andre, and **Tung Liu Koh.** Identification of an adipose tissue-like lipoprotein lipase in perfusates of chicken liver 768

Benson, A. A. See *Warner and Benson* 548

Bhaduri, N. See *Kundu et al.* 128

Björkhem, Ingemar, and **Karl-Eric Karlmar.** Common characteristics of the cytochrome P-450 system involved in 18- and 11β-hydroxylation of deoxycorticosterone in rat adrenals 592

Blendermann, E. M. See *Vahouny et al.* 745

Boberg, Jonas, Jan Augustin, Marietta Baginsky, Pablito Tejada, and **W. Virgil Brown.** Quantitative determination of hepatic and lipoprotein lipase activities from human postheparin plasma 544

Brecher, Peter, Hae Yung Pyun, and **Aram V. Chobanian.** Effect of atherosclerosis on lysosomal cholesterol esterase activity in rabbit aorta 154

Bremmelgaard, A. See *Almé et al.* 339

Brenneman, Douglas E., Terry Kaduce, and **Arthur A. Spector.** Effect of dietary fat saturation on acylcoenzyme A: cholesterol acyltransferase activity of Ehrlich cell microsomes 582

Brotherus, Jaakko, Tuula Niinioja, Karin Sandelin, and **Ossi Renkonen.** Experimentally caused proliferation of lysosomes in cultured BHK cells involving an increase of biphosphatidic acids and triglycerides 379

———, and **Ossi Renkonen.** Subcellular distributions of lipids in cultured BHK cells: evidence for the enrichment of lysobisphosphatidic acid and neutral lipids in lysosomes 191

Brown, W. Virgil. See *Baginsky and Brown* 423

———. See *Boberg et al.* 544

Brownlee, Nicholas R., James J. Huttner, Rao V. Panganamala, and **David G. Cornwell.** Role of vitamin E in glutathione-induced oxidant stress: methemoglobin, lipid peroxidation, and hemolysis 635

Brumley, George, and **Henk van den Bosch.** Lysophospholipase-transacylase from rat lung: isolation and partial purification 523

Bundy, Ralph, Josephine Mauskopf, James T. Walker, and **Leon Lack.** Interaction of uncharged bile salt derivatives with the ileal bile salt transport system 389

Burstein, Shlomo. See *Lavi et al.* 232

C

Caffrey, Martin, and **John E. Kinsella.** Growth and acyltransferase activity of rabbit mammary gland during pregnancy and lactation 44

Cahill, Patrick T. See *Siskos, Cahill, and Javitt.* 666

Carew, T. E. See *Koschinsky et al.* 451

Carter, Janet A. See *Cowen et al.* 692, 698

Chagoya de Sanchez, Victoria. See *García-Sáinz et al.* 93

Chakravarty, S. See *Kundu et al.* 128

Chen, Jung-shou. See *Schonfeld et al.* 645

Cheng, F. W., S. Shefer, B. Dayal, G. S. Tint, T. Setoguchi, G. Salen, and **E. H. Mosbach.** Cholic acid biosynthesis: conversion of 5β-cholestane-3α,7α,-12α,25-tetrol into 5β-cholestane-3α,7α,12α,24β,25-pentol by human and rat liver microsomes 6

Chobanian, Aram V. See *Brecher et al.* 154

Chojnacki, T. See *Radominska-Pyrek et al.* 53

Cohen, Bertram I., Robert F. Raicht, and **Erwin H. Mosbach.** Sterol metabolism studies in the rat. Effects of primary bile acids (sodium taurochenodeoxycholate and sodium taurocholate) on sterol metabolism 223

Cornwell, David G. See *Brownlee et al.* 635

———. See *Patil and Cornwell* 1

SUBJECT INDEX

VOLUME 18 NUMBERS 1–6

A

Absorption, intestinal: Of cholesterol, effect of puromycin 745
ACAT *see* **Acylcoenzyme A:cholesterol acyl transferase**
ACTH: Effect of hydroxylation, rat adrenal 592
Acylcoenzyme A: cholesterol acyltransferase: In Ehrlich ascites cell microsomes, effect of dietary fat on activity 582
Acylglycerols: Radioenzymatic assay 396
Acyltransferase: Activity of rabbit mammary gland during pregnancy and lactation 44
Adipocytes
Cellularity and metabolism, improved techniques for study of 552
Differentiation in growing male rats 480
Free fatty acid release, pH as an indicator 774
Large rat, insensitivity to antilipolytic effects of insulin 459
Adipose tissue: Porcine, cellularity, effect of growth and adiposity 275
Adrenal gland: Rat and bovine, hydroxylation of deoxycorticosterone by cytochrome P-450 system 592
Alkyl ether: Species of phosphatidylcholine in bovine heart 710
1-Alkylglycerols: GLC–MS of 474
Ammonium pentachlorooxomolybdate: In spray reagent for detection of phospholipids 128
Anal sac secretion lipids: Of the red fox and the lion 474
Analogs of natural lipids: Cyclopentanoid analogs of phosphatidic acid 77, 81
Aorta: Rabbit, lysosomal cholesterol esterase activity 154
Apo HDL peptides: Two-dimensional electrophoresis of 69
Apolipoprotein(s)
A-I, quantification in human serum lipoproteins 759
A-I, rat, radioimmunoassay of 465
A-I, rat serum, isoelectric focusing of 59
A-I, secretion by isolated perfused rat liver 465
A-II, in human HDL, radioimmunoassay of 645
A-IV, rat serum, isoelectric focusing of 59
B, quantification in human serum lipoproteins 759
C-II, rat serum, isoelectric focusing of 69
C-III, binding to phosphatidylcholine bilayer mixture 14
C-III, phospholipid complexes, properties of 14
C-III, rat serum, isoelectric focusing of 69
Composition, of VLDL and HDL secreted by perfused rat liver 465
Rat, alterations after cholesterol feeding 314
Rat serum, analysis by isoelectric focusing 59, 69
Apoprotein composition: Of VLDL from subjects with double pre-β lipoproteinemia and dysbetalipoproteinemia 613
Arginine-rich apolipoprotein
From human VLDL, isoelectric focusing of 613
Rat, radioimmunoassay of 465
Rat serum, isoelectric focusing of 59
Secretion by isolated perfused rat liver 465
Arginine-rich protein: In VLDL of control and hypercholesterolemic rats 314
ARP: *see* **Arginine-rich apolipoprotein**
Astroblasts: Cultured, glycosphingolipids in 517
Atherosclerosis: Effect of on lysosomal cholesterol esterase activity in rabbit aorta 154
[γ-^{32}P]ATP: As substrate in assay for glycerol and acylglycerols 396

B

BHK cells: *see* **Fibroblasts, cultured hamster**
Bile acids
Excretion in the bile fistula rat 623
[24-^{13}C]Labeled, synthesis of 400
Primary, in diet, effect on sterol metabolism in rats 223
Serum, enzymatic analysis of using dual-beam spectrophotofluorimetry 666
Serum, radioimmunoassay of sulfated lithocholates 698
Serum, radioimmunoassay of unsulfated lithocholates 692
Synthesis and metabolism, in germfree rats, effect of dietary cholesterol 717
Synthesis in the rat, effect of primary bile acids and cholesterol in the diet 223
Synthesis of glycine and taurine conjugates 404
In urine, analysis by computerized GLC–MS 339
In urine, ion-exchange chromatography 339
In urine, quantitative analysis of 339
Use of [11,12-^{3}H]chenodeoxycholic acid and [11,12-^{3}H]-lithocholic acid in metabolic studies 753
Bile acid sulfates
Conjugated, hydrolysis–solvolysis procedure 118
Synthesis of 491
Biliary excretion: Of bile acids, phosphatidylcholine and cholesterol in the bile fistula rat, effect of ethynylestradiol 623
Biliary mixed micelles: Electron spin resonance of cholestane spin label 417
Bile salts
Conjugated, uncharged, interaction with ileal bile salt transport system 389
Ideal transport system 389
Biphosphatidic acids: In proliferating lysosomes of BHK cells 379
Brain
Bovine, plasmalogenase activity in fractions of 115
Rat, phosphatidic acid phosphohydrolase activity 777

C

Carbon dioxide: Effect of on phospholipid synthesis in lung 309
Cation transfer: Between aqueous and nonaqueous phases 1

Cerebrosides
Determination of, nanomole quantities 285
HPLC, gradient elution analysis 285
Cerebrotendinous xanthomatosis: Bile acid synthesis in 6
***Ceropithecus aethiops*:** Characterization of plasma low density lipoproteins 211
Chenodeoxycholic acid
11,12-^{3}H-Labeled, suitability for isotope dilution studies of bile acid metabolism in man 753
Synthesis in germfree rats 717
5β-cholanic acids: Synthesis of glycine and taurine conjugates 404
Cholestane: Spin label, electron spin resonance 417
5β-Cholestane-3α,7α,12α,24β,25-pentol: Biosynthesis from 5β-cholestane-3α,7α,12α,25-tetrol by human and rat liver microsomes 6
5β-Cholestanepentols: Thin-layer chromatography of 6
5β-Cholestane-3α,7α,12α,25-tetrol: Conversion into 5β-cholestane-3α,7α,12α,24β,25-pentol by human and rat liver microsomes 6
Cholesterol
Absorption in the rat 223
Absorption in the rat, inhibition by puromycin 745
Biliary, excretion in the bile fistula rat 623
Dietary, effect on rabbit plasma very low density lipoprotein 169
Dietary, effect on rat plasma lipoproteins 314
Dietary, effect of on synthesis and metabolism of cholesterol in germfree rats 717
Dietary in nonhuman primates, effect on LDL 211
Effect on fluidity of phospholipid matrix in mixed micelles of bile lipids 417
7α-Hydroxylase, A review 135
Lysosomal esterase, activity in rabbit aorta, effect of atherosclerosis 154
Metabolism in the rat, effect of primary bile acids and cholesterol in the diet 223
Microdetermination, in serum lipoproteins 259
Monohydrate, water-induced precipitation from triolein 203
Plasma, distribution in lipoproteins of Zucker rats 604
Side chain, cleavage by mitochondria and submitochondrial systems of rat and bovine adrenals 592
Solubility in an oil phase 203
Synthesis, kinetics, in man 99
Synthesis, in rat ileum 722
Synthesis and metabolism, in germfree rats, effect of dietary cholesterol 717
Turnover in the rat 223
Cholesteryl ester
Chylomicron, catabolism of in Zucker rats 604
Of chylomicron remnants, major constituents of VLDL in cholesterol-fed rabbits 169
Interaction with triglyceride in human plasma VLDL 164
Source of, in rat chylomicrons 293
Synthesis of in Ehrlich ascites cell microsomes 582
Cholesteryl oleate: In phospholipid vesicles, assay of acid hydrolase with 154
Cholic acid
Biosynthetic pathway 6
Synthesis from 3α,7α,12α-trihydroxy-5-β-cholestan-26-oic acid in humans 656
Cholinephosphotransferase: Activity in rat brain and liver microsomal fractions 53
Choline plasmalogens: In bovine heart 710
In vitro synthesis of 53
Chromatography, agarose-gel
Of nonhuman primate lipoproteins 211
Of plasma lipoproteins of rhesus monkeys 734
Chromatography, column: Heparin–Sepharose gel, of human postheparin plasma 423
Chromatography, DEAE–cellulose: Of low molecular weight apolipoproteins 69
Chromatography, gas–liquid
Absorption in man, determination by intestinal perfusion 263
And mass spectrometry of l-alkylglycerols 474
And mass spectrometry of urine bile acids 339
Chromatography, high peformance liquid
Of cerebrosides 285
Of perbenzoyl derivatives of glycosphingolipids 371
Purification of phosphatidylethanolamine, lysophosphatidylethanolamine, and phosphatidylcholine 704
Chromatography, ion-exchange: Of urine bile acids 339
Chromatography, thin-layer
Of anal sac secretion lipids (red fox and lion) 474
Of 5β-cholestanepentols 6
Of gangliosides 660
Of gangliosides and neutral glycolipids of cultured astroblasts 517
Of phospholipids 128
Chylomicron(s)
Catabolism of triacylglycerol and cholesteryl ester of, in genetically obese (Zucker) rats 604
Lipids, metabolism in cholesterol-fed rabbits 169
Rat intestine, assembly, intracellular transport, and secretions 496
Remnants, hepatic removal in cholesterol-fed rabbits 169
Circadian rhythm: Of rat liver HMG CoA reductase and 7α-hydroxylase effect of ethanol 325
Circular dichroism: Of apolipoprotein C-III–phospholipid mixtures 14
Concanavalin A: Effect of on specific binding of insulin to rat liver plasma membranes 533
Corpora lutea: Rat, lipid metabolism 246
Crypt cells
Intestinal, sterol synthesis in, rats and guinea pigs 301
Rat ileum, HMG CoA reductase activity 722
Cycloheximide: Action on glucose and lipid metabolism in epididymal fat pad 93
Cynomolgus macaques: *see* ***Macacca fascicularis***
Cytochrome P-450 system: Hydroxylation of deoxycorticosterone in rat adrenals 592

D

Deoxycorticosterone: 18- and 11β-Hydroxylation in rat and bovine adrenals 592
Desaturase: Stearoyl coenzyme A, assay for terminal enzyme using chick embryo liver microsomes 32
1,2-Diacyl-*sn*-glycero-3-phosphocholine: Subtrate for assay of glycerophospholipid hydrolase activity 123
1,2-Diacyl-*sn*-glycero-3-phosphoethanolamine: Substrate for assay of glycerophospholipid hydrolase activity 123

20,25-Diazacholesterol: Induction of HMG CoA reductase by 24
Diet
High fat, effect on insulin binding by rat liver plasma membranes 533
High glucose, effect on insulin binding by rat liver plasma membranes 533
Dietary fat: In mice, effect of on ACAT activity in Ehrlich ascites cells 582
Differential scanning calorimetry: In studies of properties of VLDL and LDL 164
2,2′-Dimethoxypropane: Use of in dehydrating tissue for direct transesterification of lipids 540
Dysbetalipoproteinemia, primary: Characterization of VLDL in 613

E

Ehrlich ascites cells
ACAT activity in microsomes of 582
Incorporation of ^{32}P into phospholipids 239
Electron microscopy
Of BHK cells 379
Of lipid-rich particles of cultured hamster fibroblasts 191
Of perfused rat liver 465
Of rat chylomicrons 496
Of rat intestinal epithelial absorptive cells 496
Electron paramagnetic resonance: In studies of structure of pig lipoproteins 182
Electron spin resonance: Of cholestane spin label in biliary lipids 417
Electrophoresis
Agarose, of plasma lipoproteins of rhesus monkeys 734
Agarose gel, of human serum and VLDL, normolipemic and hyperlipemic 613
Gel, of rat serum apolipoproteins 59, 69
Polyacrylamide gel, of plasma lipoproteins of rhesus monkeys 734
Polyacrylamide gel, SDS, of rat apolipoproteins 314
SDS-polyacrylamide gel, of apolipoproteins from LDL of *M. fascicularis* 211
Endothelial cells: Bovine aortic, uptake of VLDL triglyceride 561
Epididymal fat pad: Rat, effect of cycloheximide on glucose and lipid metabolism 93
Rat, lipoprotein lipase activity 480
Epinephrine: Effect on glycerol release from large and small rat adipocytes 459
Essential fatty deficiency: Effect of on PGE_2-9-ketoreductase activity 37
Esterified cholesterol: Of chylomicron remnants, major constituents of VLDL in cholesterol-fed rabbits 169
Ethanol: Administration to rats, effects on liver HMG CoA reductase and 7α-hydroxylase 325
Ethanolaminephosphotransferase: Activity in rat brain and liver microsomal fractions 53
Ethanolamine plasmalogens
In vitro synthesis of 53
Myelin, catabolism by oligodendroglial plasmalogenase 115
Ether lipids: Synthesis by rat brain and liver microsomal fractions 53
Ethynylestradiol: Effect on biliary excretion of bile lipids in the bile fistula rat 623

F

Fabry's disease: Plasma neutral glycolipids 371
Fat absorption: In the rat, an electron microscopic study 496
Fatty acid(s)
Composition, of neutral glycolipids and gangliosides of cultured astroblasts 517
Composition, of rat corpora lutea lipids 246
Effect of, on phospholipid synthesis by Ehrlich ascites cells 239
Free, in blood, colorimetric determination of 665
Free, esterification in epididymal fat pad, effect of cycloheximide 93
Free, release from adipocytes, pH as an indicator 710
Synthesis, in rat corpora lutea 246
trans-, Dietary, influence on swine lipoprotein composition and structure 182
Fecal steroid analysis: In measurement of cholesterol synthesis in man 99
Fibroblasts
Cultured hamster, electron microscopy of 379
Cultured hamster, enrichment of lysobisphosphatidic acid and neutral lipids in lysomes 191
Cultured hamster, lipids of 379
Cultured hamster, lysosome proliferation, increase in biphosphatidic acids and triglycerides 379
Cultured hamster, phospholipids, neutral lipids, and marker enzymes in fractions of 191
Cultured human, binding of LDL and HDL, regulation by sterols 451
Cultured human, normal, binding, internalization, and degradation by HDL 438
Cultured human, normal, lipoprotein binding and HMG CoA reductase levels 596
Cultured human, tumor virus-transformed, lipoprotein binding and HMG CoA reductase levels 512
Fluorescence spectra: Of apolipoprotein C-III–phospholipid mixtures 14

G

Gangliosides
In cultured astroblasts, TLC of 517
Separated by TLC, assay of 660
Gaucher's disease: Plasma neutral glycolipids 371
Germfree rats: Synthesis and metabolism of cholesterol and bile acids in 717
GLC–MS: *see* **Chromatography, gas–liquid,** and **Mass spectrometry**
Glucose
[U-^{14}C]-Labeled, incorporation into lung phospholipids 309
Oxidation and uptake in epididymal fat pad, effect of cycloheximide 93
Glycerol: Radioenzymatic assay 396
Glycerol kinase: In radioenzymatic assay for glycerol and acylglycerols 396
Glycerophospholipid hydrolase: Activity, assay for in postheparin plasma 123
Glycosphingolipids, neutral
In Krabbe's, Fabry's, and Gaucher's diseases 371
Of plasma, quantitative analysis of by HPLC 371

Golgi vesicles: Of rat intestinal absorptive cells, accumulation of nascent chylomicrons 496
***sn*-Glycero-3-phosphocholine:** Acylation, in presence of sodium methylsulfinylmethide 548
Glycolithocholic acid: Sulfate esters, synthesis of 491
Glycosphingolipids: In cultured astroblasts 517
Grivet monkey: *see* ***Cercopithecus aethiops***

H

HDL: *see* **High density lipoprotein**
Heart: Bovine, plasmalogens in 710
Hemolysis: GSH-induced, role of Vitamin E 635
Hepatic lipase: Quantitative determination in human postheparin plasma 544
HFH: *see* **Homozygous familial hypercholesterolemia**
High density lipoprotein
Binding, internalization, and degradation by cultured normal human fibroblasts 438
Binding to normal and HFH cultured human fibroblasts, regulation by sterols 451
In cholesterol-fed rats, alterations 314
Content of apolipoprotein A-II 645
Effect on lipid synthesis in normal human fibroblasts 438
Isoelectric focusing of apoproteins 59
HMG CoA reductase: *see* **3-Hydroxy-3-methylglutaryl coenzyme A reductase**
Homozygous familial hypercholesterolemia: *see* **Hypercholesterolemia**
HPLC: *see* **Chromatography, high performance liquid**
Hydrogen peroxide: In GSH-induced oxidant stress 635
Hydrolase, acid: Activity in rabbit aorta, effect of atherosclerosis 154
Hydroxycholesterol
7α, determination in human meconium 232
(22*R*)-22, determination in human meconium 232
26, determination in human meconium 232
7α-Hydroxylase: Activity in rat liver, effect of ethanol administration 325
Hydroxylation
Of deoxycorticosterone by cytochrome P-450 system in rat adrenals 592
24β, by liver microsomal enzymes 6
3-Hydroxy-3-methylglutaryl coenzyme A reductase
Activity in liver microsomes of germfree rats 717
Activity in rat liver, effect of ethanol administration 325
Comparison of assays 408
Induction of by 20,25-diazacholesterol 24
In normal and tumor virus-transformed human fibroblasts 512
Quantitative assay of 408
Regulation in rat leukocytes 572
In villous and crypt cells of rat ileum 722
Hypercholesterolemia
Homozygous familial, cultured fibroblasts, binding of LDL and HDL 451
Origin of esterified cholesterol in VLDL, rabbit 169
Hyperlipoproteinemia: In cholesterol-fed rats 314

I

Ileal gut sacs: Bile acid transport 389
Immunoelectrophoresis
Of human apolipoprotein A-II 645
Two-dimensional, of arginine-rich protein of rat VLDL 314
Insulin
Binding, by rat liver plasma membranes, effect of diet 533
Insensitivity, of large rat adipocytes 459
Intestinal absorption: Of uncharged bile salt derivatives 389
Intestinal absorptive cells: During fat absorption, electron microscopic study 496
Intestinal villi: Sterol synthesis in, rats and guinea pigs 301
Isoelectric focusing
Of ARP from human VLDL 613
Of rat serum apolipoproteins 59, 69
Of VLDL and HDL apolipoproteins 465
Isotope dilution studies: Of bile acid metabolism in man 753

K

Krabbe's disease: Plasma neutral glycolipids 371

L

LCAT: *see* **Lecithin-cholesterol acyl transferase**
LDL: *see* **Low density lipoprotein**
Lecithin: Various species in bovine heart 710
Lecithin-cholesterol acyl transferase
Activity, in rat intestinal lymph 293
Serum, inhibition by apolysoproteins 293
Leukocytes: Rat, regulation of HMG CoA reductase in 572
Lion: *see* ***Panthera leo***
Lipase, acid: Activity in rabbit aorta, effect of atherosclerosis 154
Lipid(s)
Of anal sac secretions of the red fox and the lion 474
Direct transesterification via dehydration by 2,2′-dimethoxypropane 540
Plasma and liver, concentration of in cholesterol-fed Zucker rats 604
Stereochemistry, of cyclopentanoid analogs of phosphatidic acid 77, 81
Lipid metabolism
In cultured human fibroblasts 512
In regressing rat corpora lutea of pregnancy 246
Lipid peroxidation: Role of Vitamin E 635
Lipid phase behavior: In very low and low density lipoproteins 164
Lipid–protein association: Binding of apolipoprotein C-III to phosphatidylcholine bilayer mixtures 14
Lipolysis
Adipocytes, pH as indictor of free fatty acids 774
Effect of cycloheximide in epididymal fat pad 93
In large and small rat adipocytes, effect of insulin on 459
Lipolytic activity: In chicken liver perfusates 768
Lipoprotein binding: In normal and tumor virus-transformed human fibroblasts 512
Lipoprotein lipase
Activity in adipocytes of growing rats 480
Activity in rat epididymal fat pads 480
Adipose tissue-like in perfusates of chicken liver 768
From human postheparin plasma, characteristics 423

Quantitative determination in human postheparin plasma 544
In rat skeletal muscles 363

Lipoproteins, plasma
Rat, alterations after cholesterol feeding 314
Of rhesus monkeys (*Macaca mulatta*), separation and characterization 734
Swine, effect of dietary *trans*-fatty acids 182

Lipoproteins, serum
Human, fractionation by single-spin gradient ultracentrifugation 759
Microdetermination of cholesterol 259

Liposomes: Uptake of triglyceride from, by endothelial cell monolayers 561

Lithocholates
Sulfated, serum, radioimmunoassay 698
Unsulfated, serum, radioimmunoassay 692

Lithocholic acid
11,12-^{3}H-Labeled, suitability for isotope dilution studies of bile acid metabolism in man 753
Sulfate esters, synthesis of 491

Liver
Perfused chicken, adipose tissue-like lipoprotein lipase activity 768
Plasma membranes, effect of diet on insulin binding, rats 533

Low density lipoprotein
Binding, internalization, and degradation by cultured normal human fibroblasts 438
Binding to human fibroblasts 512
Binding to normal and HFH cultured human fibroblasts, regulation by sterols 451
In cholesterol-fed rats, alterations 314
Effect on lipid synthesis in normal human fibroblasts 438
Nonhuman primates fed cholesterol, characterization 211
Study of properties by differential scanning calorimetry 164

Lp(a) lipoprotein, plasma
Human, radioimmunoassay 331
In myocardial infarction survivors 331

Lung
Phosphatidylcholine and phosphatidylglycerol metabolism 309
Rat, lysophospholipase-transacylase isolation and partial purification 523
Surfactant, fraction, phospholipid metabolism 309

Lymph, intestinal: Rat, lecithin–cholesterol acyl transferase activity 293

Lysobisphosphatidic acid
In lysosomes of cultured hamster fibroblasts 191
In proliferating lysosomes of BHK cells 379

Lysophosphatidylethanolamine: Purification by HPLC 704

Lysophospholipase-transacylase: In rat lung, isolation and partial purification 523

Lysosomes
In BHK cells, bisphosphatidic acids and triglycerides in 379
Of cultured hamster fibroblasts, lysobisphosphatidic acid and neutral lipids in 191

M

***Macaca fascicularis*:** Characterization of plasma low density lipoproteins 211
Macaca mulatta
Characterization of plasma low density lipoproteins 211
Plasma lipoproteins, separation and characterization 734

Mammary gland: Rabbit, acyltransferase activity of 44
Marker enzymes: In fractions of cultured hamster fibroblasts 191
Mass spectrometry
Of di(trimethylsilyl)ethers of hydroxycholesterols 232
And GLC of urine bile acids 339
Meconium: Human, determination of hydroxysterols 232
Methylsulfinylmethide, sodium: Use of in preparation of unsaturated phosphatidylcholines 548
[2-^{14}C]Mevalonate: Use of in measuring parameters of cholesterol metabolism in man 99
Mixed lipid films: Counterion binding 1
Molecular species: Of phosphatidylethanolamine, lysophosphatidylethanolamine, and phosphatidylcholine 704
Multicompartmental analysis: Of cholesterol metabolism in man 99
Myelin: Plasmalogens, catabolism of 115

N

Neuraminidase: Action of on HDL apoproteins 69
Neutral lipids: In fractions of cultured hamster fibroblasts 191
NMR Spectroscopy: Of cyclopentanoid analogs of phosphatidic acid 81
Nuclear magnetic resonance: Of 1,2-dilinoleoyl-*sn*-glycero-3-phosphorylcholine 548

O

Obesity, genetic: Catabolism of chylomicron triacylglycerol and cholesteryl ester, in rats with 604
Oligodendroglia: Bovine brain, plasmalogenase activity 115

P

Palmitoyl-CoA: Hydrolysis by postheparin hepatic triglyceride lipase and lipoprotein lipase 423
***Panthera leo* (lion):** Lipids in anal sac secretions 474
Perbenzoylation: Of neutral glycolipid mixtures 379
Perfused liver
Chicken, identification of an adipose tissue-like lipoprotein lipase 768
Rat, secretion of arginine-rich and A-I apolipoproteins 465
Peroxidation: Lipid, role of Vitamin E 635
PGE_2: *see* **Prostaglandin E_2**
$PGF_{2\alpha}$: *see* **Prostaglandin $F_{2\alpha}$**
pH: As indicator of free fatty acid release from adipocytes 774
Phase diagram: Cholesterol–oil–water 203
Phosphatidic acid
Cyclopentanoid analogs of 77, 81
Cyclopentanoid analogs of, synthesis 81
^{32}P, in assay of phosphatidic acid phosphohydrolase activity 777

Phosphatidic acid phosphohydrolase: Radiochemical assay 777
Phosphatidylcholine(s)
Alkyl ether species in bovine heart 710
Bilayers, binding of apolipoprotein C-III 14
Biliary, excretion in the bile fistula rat 623
Metabolism in lung, effect of CO_2 concentration 309
Purification by HPLC 704
Synthesis by rat lung supernatant, from lysophosphatidylcholine 523
Unsaturated, preparation of 548
Phosphatidylethanolamine: Purification by HPLC 704
Phosphatidylglycerol: *Metabolism in lung, effect of CO_2* concentration 309
Phospholipid(s)
Detection on thin-layer plates by novel spray reagent 128
In fractions of cultured hamster fibroblasts 191
Egg yolk, high performance liquid chromatography of 704
Synthesis of, in Ehrlich ascites cells 239
Turnover of, in Ehrlich ascites cells 239
Phospholipid vesicles: Containing cholesteryl oleate 154
Plasmalogenase activity: In white and grey matter fractions of bovine brain 115
Plamalogens: In bovine heart 710
Plasma, postheparin
Assay for glycerophospholipid hydrolase activity 123
Human, characteristics of lipoprotein lipase and hepatic triglyceride lipase 423
Human, column chromatography on heparin–Sepharose gel 423
Human, quantitative determination of lipoprotein lipase and hepatic lipase 544
Postheparin lipolytic activity: *Determination of hepatic* and lipoprotein lipase 544
Pre-β lipoproteinemia, double: *Characterization of* VLDL in 613
Prostaglandin(s)
E_2, conversion of into $PGF_{2\alpha}$ by rat and human skin 37
$F_{2\alpha}$, formation from PGE_2 by rat and human skin 37
Prostaglandin E_2-9-ketoreductase: Activity in proliferating skin 37
Psoriasis: PGE_2-9-ketoreductase activity in 37
Puromycin: Inhibition of cholesterol absorption in the rat 745
Pyrene-fluorescence: In studies of structure of pig lipoproteins 182

R

Rabbit: Cholesterol-fed, very low density lipoprotein of 169
Radioenzymatic assay: For glycerol and acylglycerols 396
Radioimmunoassay
Of arginine-rich and A-I apolipoproteins 465
Of human apolipoprotein A-II 645
Of human plasma, Lp(a) lipoprotein 331
Of serum sulfated lithocholates 698
Of serum unsulfated lithocholates 692
Red blood cells: Morphology of during GSH-induced oxidant stress, effect of Vitamin E 635
Red fox: *see* ***Vulpes vulpes***
Regulation: Of cholesterol 7α-hydroxylase (Review) 135
Retinol-binding protein
Association with prealbumin 679
Piscine, isolation and partial characterization 679
[^{3}H]Retinyl acetate: In study of origin of esterified cholesterol in VLDL of cholesterol-fed rabbits 169
Rhesus monkey: *see* ***Macacca mulatta***

S

Scatchard plots: Of insulin binding to liver plasma membranes 533
Serum: Effect of, on phospholipid synthesis by Ehrlich ascites cells 239
Sialic acid: In gangliosides, recovery from thin-layer chromatograms 660
β-Sitosterol: In studies of cholesterol absorption in man 263
Skeletal muscle: Rat, lipoprotein lipase in 363
Skin: *Rat and human, prostaglandin formation by 37*
Spectrophotofluorimetry, dual-beam: Enzymatic analysis *of serum bile acids by 666*
Stearate: Anion–alkaline earth cation complexes, surface *properties 1*
Stearate–fatty alcohol films: Surface properties 1
Stearoyl coenzyme A desaturase: Terminal enzyme, assay for 32
Steroid dehydrogenase: Use of in analysis of serum bile acids 666
Sterol(s)
Metabolism in the rat, effect of primary bile acids and cholesterol in the diet 223
Regulation of binding of LDL and HDL to cultured human fibroblasts 451
Synthesis, by intestinal villi and crypt cells, rats and guinea pigs 301
Sucrose uptake: By cultured normal human fibroblasts 438
Sulfated bile acids: *Conjugated, hydrolysis–solvolysis* procedure 118
Superoxide: *In GSH-induced oxidant stress 635*
Surface properties: Of fatty acid and fatty acid–alcohol *mixtures 1*
Swine: Lipoprotein composition and structure, influence *of dietary trans-fatty acids 182*

T

Taurochenodeoxycholate, sodium: Dietary, effect on sterol metabolism in rats 223
Taurocholate, sodium: Dietary, effect on sterol metabolism in rats 223
Taurolithocholic acid: Sulfate esters, synthesis of 491
TLC: *see* **Chromatography, thin-layer**
Transacylase-lysophospholipase: Activity, in rat lung 523
Transesterification: Direct, of lipids via dehydration by 2,2′-dimethoxypropane 540
Triacylglycerol: Chylomicron, catabolism of in Zucker rats 604
Triglyceride
Interaction with cholesteryl ester in human plasma VLDL 164

VLDL, uptake and metabolism by bovine aortic endothelial cells in culture 561

Triglyceride lipase

Activities, determination in human postheparin plasma 544

Hepatic, from human postheparin plasma, characteristics 423

3α,7α,12α-Trihydroxy-5β-cholestan-26-oic acid: Metabolism in normal subjects 656

Tritiated water: Use of in measuring parameters of cholesterol metabolism in man 99

Turnover: Of cholesterol in man 99

U

Ultracentrifugal behavior: Of apolipoprotein C-III–phospholipid mixtures 14

Ultracentrifugation: Single-spin gradient, of human serum lipoproteins 759

Urine: Bile acids, analysis by computerized GLC–MS 339

V

Vertebrates, nonmammalian: Transport of Vitamin A 679

Very low density lipoprotein

Of cholesterol-fed rabbits 169

In cholesterol-fed rats, alterations 314

Human, characterization in double pre-β- and primary dysbetalipoproteinemia 613

Human, interaction of cholesteryl ester and triglyceride 164

Isoelectric focusing of apoproteins 59

Study of properties by differential scanning calorimetry 164

Triglyceride, uptake by bovine aortic endothelial cells in culture 561

Villous cells: Rat ileum, HMG CoA reductase activity 722

Vitamin A: Transport in plasma of nonmammalian vertebrates 679

Vitamin E: Role of in lipid peroxidation and hemolysis 635

VLDL: *see* **Very low density lipoprotein**

***Vulpes vulpes* (red fox):** Lipid in anal sac secretions 474

X

X-Ray scattering: In studies of properties of VLDL and LDL 164

Z

Zucker rats: Catabolism of chylomicron triacylglycerol and cholesteryl ester 604

NEW METHODS INDEX

Volume 18, Numbers 1–6

Compiled by H. A. I. Newman and R. S. Newman

The numbers in this index refer to entry numbers in the New Methods listings, which are found on the pages of Volume 18 given below.

Nos. 1–41, pp. 131–132
Nos. 42–84, pp. 272–273
Nos. 85–134, pp. 414–416
Nos. 135–173, pp. 558–559
Nos. 174–223, pp. 672–674
Nos. 224–278, pp. 781–783

ENTRY NO.

N-Acetyl-β-glucosaminidase: In human urine, colorimetric assay 88
N-Acetyl-β-D-glucosaminidase: Assay in urine of patients with renal transplants as an indicator of rejection 233,236
N - Acetyl - β - D - hexosaminidase: Hydrophobic chromatography 86
Acyl derivatives: Characterization with synthesized N[2,3-^{3}H](*n*-propyl)hydroxylamine 242
Acyl phosphates: Hydroxylamine assay, pH dependence 93
Aflatoxins
- B_1, nondestructive distinction from ethoxyquin in thin-layer chromatography 225
- Corn, various analytical methods 136
- In corn and wet milled corn products, quantitative determination 224
- In cottonseed products, high-pressure liquid chromatography 135
- In wines, reversed-phase high-pressure liquid chromatography with fluorescence detection 137

Alcohols
- C_1–C_8 straight chain, correlation between physical properties and gas chromatographic behavior on polar and nonpolar stationary phases 146

Amino sugars: Determination in glycoproteins 192
Aniline citrate: Stepwise detection of sugars containing, on paper and thin-layer chromatograms 159
Apolipoproteins
- B: comparison with β-cholesterol 222
- human plasma, radioimmunoassay 201
- human serum, immunoassay methods 64
- quantitation in grossly normal human aorta 113
- structure in familial hyperbetalipoproteinemia 204
- E: Human, determination by electroimmunoassay 63
- Rat serum, analysis by isoelectric focusing 202,205
- Rat serum, argenine-rich, radioimmunoassay 111

BHA (3-*tert*-butyl-4-hydroxyanisole): GLC behavior and detection limits compared with 2,6-di-*tert*-butyl-4-methyl phenol 226

ENTRY NO.

BHT: Determination in resmethrin by high-pressure liquid chromatography 1
Bile acid ethyl esters: Infrequent formation during routine bile acid analysis and identification by GLC–mass spectrometry 138
Bile acid methyl ester acetate derivatives: Characterization using GLC, electron impact, and chemical ionization mass spectrometry 177
Bile acids
- Analysis, formation of ethyl esters during, identification by GLC–mass spectrometry 138
- Conjugated and free, sialic acid thin-layer chromatography 43
- Conjugated, separation by high-pressure liquid chromatography 2
- Conjugates, quantitative analysis in duodenal aspirate by fluorimetry after cellulose acetate electrophoresis 42
- GLC, dosage in bile and serum 139
- Glycine-conjugated, separation from taurine-conjugated 227
- Hydrolysis–solvolysis of conjugated sulfates 174
- Liquid chromatographic separation 229
- Serum, fluorimetric estimation in liver disease 140
- Side-chain degradation, (C-2)–(C-3) cleavage 175
- Sulfated and nonsulfated, isolation from serum by a simple batch adsorption procedure 85
- Taurine-conjugated, separation from glycine-conjugated 227

Bile salts: Primary conjugated, ^{125}I radioimmunoassay 176
3-*tert*-Butyl-4-hydroxanisole: *see* **BHA**
***tert*-Butyl-3-hydroxy-*t*-oxo-1-cyclopentene heptanoate:** *see* **Prostaglandin intermediates**
2,6-di-*tert*-Butyl-4-methylphenol: GLC behavior and detection limits, compared with BHA and its trifluoroacetate 226

Carbohydrates
- Isomerization products, high-pressure liquid chromatography 60
- Partially protected, oxidation process for 58
- Separation on a new polar bonded phase material 59

ENTRY NO.

Substituted, separation by high-pressure liquid chromatography 106
Carboxylic acids
Analysis 20
And anions, electronic absorption 22
Carotenes: (2*R*,6*S*,2′*R*,6′*S*) - 2,2′ - Dimethyl - γ,γ - and (2*R*,2′*R*,6′*S*)-2,2′-dimethyl-β,γ-, synthesis 180
Carotenoids: Pigmenting, in feeds and premixes for laying hens and broilers, determination of 143
Cholecalciferol: Quantitation in presence of photochemical isomers of, application to cholecalciferol resins 181
Cholestanes: Containing oxygenated 14α-methyl group, synthesis 221
Cholesterol
Beta-lipoprotein, compared to apoprotein B levels 222
Beta-lipoprotein quantitation with polycations 272
C_4-Alkylated, electron ionization-induced fragmentation 129
Determination in beta-lipoproteins 171
Enhancement of concentration in preparation of serum control materials, using cholesterol-rich bovine lipoprotein 39
Esterification in vitro in human serum 237
Free and esterified, enzymatic determination in plasma and other biological preparations using oxygen electrode in a modified glucose analyzer 127
Free and esterified, rapid enzymatic determination in serum and tissues 80
[7α-^{3}H]- and [7α,7β-^{3}H]-, Use in enzymatic assay of cholesterol 7α-hydroxylase 178
Human serum, quantitative analysis by TLC spot test 275
3β-Iodo-, labeled, synthesis for adrenal imaging 278
Radiohalogen derivatives 274
Serum: comparison of GLC and two other methods for determination 128
enzymatic rate method for measurement 132
in healthy young men, differentiating analytic error from biological variability 133
Serum or plasma, enzymatic assay by amperometric measurement of rate of oxygen depletion following saponification 130
Serum–plasma paired determinations with triglycerides 131
Cholesterol esterase: Purification and characterization from porcine pancreas 89
Cholesterol 7α-hydroxylase: Enzymic assay with [7α-^{3}H] and [7α,7β-^{3}H]cholesterol 178
Cholesterol sulfate: Effect on lecithin:cholesterol acyltransferase in human plasma 48
Cholesteryl esters
Of fatty acids of different degrees of unsaturation, GLC separation 277
Preparation 276
24-nor-5α-Cholic acid: And 3β isomers, synthesis 141
Chromatography
Gas–liquid: real-time analysis of gas chromatograms with a microcomputer system 185
semispecific flame ionization detection system 57

ENTRY NO.

solute identification using peak shape analysis 56
High-pressure liquid: mini-computer automated spectrometer system for 44
recycling in 45
Linear spectrodensitometer, development and utilization 5
Thin-layer: automatic applicator for 83
computer-controlled evaluation in 81
design of photometric instrument for 4
preparation and scanning by ultraviolet transmission 3
programmed multiple development in 82
simple, disposable streaking sample applicator for 134
use of gaseous electrical discharge to induce fluorescence in separated organic compounds 84
Concanavalin A: Binding, competency assay for 33
Cyclopentenediones: Synthesis 51
Detergents
Anionic, determination at p.p.b. levels by graphite furnace atomic absorption spectrometry 46
Anionic, determination in presence of other methylene-blue-active substances 231
Ergocalciferol: Quantitation in presence of photochemical isomers of 181
Esterases: Organophosphate-sensitive, in rat adrenals, subcellular localization by autoradiography 8
Ethoxyquin: Nondestructive distinction from aflatoxin B_1 in TLC 225
Fats: *cis-trans* Monoethylenic unsaturation, chromatographic determination 53
Fatty acid epoxides: Synthesis from methyl octadecadienoates and chromatography 97
Fatty acid esters: Olefinic, ^{13}C-NMR of 95
Fatty acid methyl esters
GLC of ethyl ester artifacts formed during preparation of 182
Methyl alkenoates and alkynoates, ^{13}C-NMR of methyl, methylene and carbonyl carbon atoms of 91
Methyl *cis*-octadecenynoates, dimethylene-interrupted, GLC behavior 150
Methyl 16-trideuteriohexadecanoate 100
Unsaturated, ^{13}C-NMR of double and triple bond carbon atoms of 92
Fatty acids
Analysis, computer processing of data 145
Butter, butyl ester preparation for GLC determination 240
^{11}C-Labeled, ^{34}M-Cl-labeled, ^{77}Br-labeled, and ^{123}I-labeled, preparation and quality control for kinetic studies of heart muscle metabolism 241
C_{22}-, GLC determination for certification of low erucic acid varieties of rapeseeds 17
Conjugated polyene, as fluorescent probes for synthetic phospholipid membranes 262
spectroscopic characterization on fluorescent probes 261
From flue-cured tobacco, GLC–mass spectrometric analysis 149

ENTRY NO.

16-Iodo-9-hexadecenoic acid and derivatives, ^{123}I-labeled, preparation for heart perfusion imaging 243
Methyl octanoates, location of double bonds with chromic acid–Celite columns 21
Octadecanoates, specifically dideuterated, preparation 151
Olefinic, ^{13}C-NMR of 95
Oxooctadecanoates, specifically dideuterated, preparation 151
Short chain, GLC–mass spectrometry of butyl esters 148
Spectrophotometric determination on potassium salts with rhodanine 6G 54
Structure determination by GLC–mass spectrometry: comparison of fragmentation patterns of derivatives 18
Trimethylsilyl derivatives of sodium salts, preparation of 98
Free fatty acids
Colorimetric determination 19
Determination as pentafluorobenzyl esters by electron capture GLC 94
4-Hydroxybutyric acid, in human plasma, GLC determination 184
2-Propyl pentanoate, in human plasma, GLC determination 184
Underivatized, GLC and automatic potentiometric titration 55
Galactosamine: Differential assay 155
Galactose: Serum, colorimetric determination 157
Galactose-1-phosphate: Radioisotopic method for estimation in galactosemia 248
β-Galactosidase: In human urine, colorimetric assay 88
Galactosylceramides: Brain, quantitative analysis by high-pressure liquid chromatography of their perbenzoyl derivatives 190
Galactosyl diglycerides: Di- and mono-, TLC determination in spinach 156,187
Gangliosides: Spin label, to determine head group interactions 249
Glucosamine: Differential assay 155
Glycerides: Aceto-, quantitative TLC separation 245
Glycerol: 1-Alkyl thioether of, synthesis 103
Glycerol acetals and ketals: Unsaturated esters, synthesis 186
Glycerophospholipid hydrolase: Assay for activity in postheparin plasma 179
Glyceryl ethers: And chromatographically related lipids, analysis 153
Glycolipids
Amines, microdetermination with 1,4-benzoquinone 105
Carbohydrate ultrastructural assay with periodic acid, comparative studies 27
Hexoses, *see* Pentoses and hexoses
Isolation by ascending dry-column chromatography 30
Membrane-bound sugars determined as alditol acetates by combined TLC, GLC, and radio GLC 29

ENTRY NO.

Membrane models, spin label and freeze-etch studies 67
Pentoses and hexoses, separation by TLC 104
see also **Carbohydrates**
Glycoproteins: Determination of amino sugars in 192
Glycosphingolipids: Blood group A specific 193
Glycosyl diglycerides: Mono- and derivatives, synthesis 102
Glycosyltransferase: α-D-Glucopyranosyl fluoride as a substrate donor 47
Hexosamines
Determination (simultaneous with neutral sugars) in glycoproteins and acid mucopolysaccharides by GLC 158
Quantitative determination using Elston-Morgan method 108
Serum, continuous-flow determination 28
Total, assay for 155
Histidine metabolites: GLC profile 218
Hydrocarbons
Aliphatic and aromatic, with 2,4,5,7-tetranitrofluorenone-modified graphitized carbon black, GLC 194
Branched chain, preparation via thiourea inclusion compounds 195
GLC determination of trace amounts in atmosphere of experimental biological containers 160
Polythene-like, determination in animal fats 196
Saturated branched, from vasolines, gel chromatography and IR structural group analysis 161
Hydroperoxides: Organic, determination with triphenylphosphine 16
25-Hydroxycholecalciferol: In cow plasma, high-pressure liquid chromatography 12
15-Hydroxy-prostaglandin dehydrogenase: Dog lung, affinity chromatography 6
***dl*-13-Hydroxyprostanoic acids:** Synthesis 126
Hyperlipoproteinemia: Type III, electron-microscopic determination of lipoprotein from patients 31
Lecithin
Dipalmitoyl, quantitation in lung wash and extracts 265
Multilayers, electron spin resonance study of anchoring of spin-labeled stearic acid in 115
In spinach, TLC determination 156,187
Lecithin:cholesterol acyltransferase
Activity measurements, interpretation and diagnostic value 7
In human plasma, effect of cholesterol sulfate and sodium dodecyl sulfate on 48
Lecithin multilayers: Electron spin resonance study of hydration steps 116
Lecithin/Sphingomyelin ratio: Determination in amniotic fluid and pharyngeal aspirates of newborn infants 211
Lipases
Human serum, colorimetric assay 234
Immobilized, substrate specificity 50

ENTRY NO.

Separation and detection using polyacrylamide gel electrophoresis 87
Serum and duodenal fluid, lipoxygenic micromethod for specific determination 235
Lipid monolayers: Electrochemical determination of structure 260
Lipids
Alkoxy, mass spectrometric studies 197
GLC with injection of samples of less than 0.05 μl 200
Hydrophilic, unsaturated, histochemical palladium chloride staining of 253
In membranes, study with quantitative electron microscopy 252
Plant neutral, class separation by TLC 254
Serum, fractionation by droplet countercurrent chromatography 109
Simple, routine chromatography 162
Stable sudanophilia, as a staining artifact 198
Total, serum, in healthy young men, differentiating analytic error from biological variability 133
Lipopolysaccharides: Labeling lipid A moiety with ^{125}I 251
Lipoprotein lipase
Assay with stable, radioactive substrate emulsion 49
Stable emulsion for activity assay 232
Lipoproteins
β-, Cholesterol determination in 171
β-, Cholesterol quantified with polycations 272
Bovine, cholesterol-rich, use to enhance cholesterol concentrations in preparation of serum control materials 39
Determination of background serum density for ultracentrifugation 65
Electrophoresis, agarose gel edge zoning effects 257
Fractionation by a precipitation method 66
Low density, immunoelectrophoretic pattern for Type III hyperlipoproteinemia 256
Phenotyping, bacterial interference and artifacts 203
Pig serum, affinity chromatography on concanavalin A–Sepharose 61
Serum, fractionation by preparative electrophoresis in polyacrylamide gel 110
Turbidity measurement after polyanion precipitation in auto-analyzer 112
From type III hyperlipoproteinemia patients, electron microscopic characterization 31
Very low density: human serum, study with turbidimetric ultracentrifugation 255
immunoelectrophoretic pattern for Type III hyperlipoproteinemia 256
relationship between lipid composition and electrophoretic mobility in agarose gel 62
X, electrophoretic mobility in postheparin plasma 163
Lithocholic acid metabolites: Produced by intestinal microflora, isolation and purification 228
Membrane envelope: Virionic, ^{13}C-NMR of 68
Membranes
Chromaffin granule, spin-label study 165

ENTRY NO.

Fluidity determination next to acetylcholine receptor by spin labels 258
Fluorescent fatty acid, biosynthetic labeling of 69
Fluorimetric measurement of lipid–ion interaction at single liposomes made from dipalmitoyl lecithin and dipalmitoyl lecithin–cholesterol 206
Lipid composition, study with quantitative electron microscopy 252
Plasma: cytoplasmic surface, rapid isolation and exposure of by use of positively charged beads 164
preparation, disruption of solid tissue for 34
receptors, photosensitive hetero-bifunctional cross-linking reagent for 259
removal of components by glyco- and taurocholate without cell lysis 32
spin-labels for micro-environment probes of adenyl cyclase, cyclic adenosine 3′:5′-monophosphate in 117
vesicles, inside-out prepared from pig lymphocyte 36
Potential, optical probes 35
Methyl hydroxylinoleates: Analysis after separation from methyl linoleate hydroperoxides 147
Methyl linoleate hydroperoxide: Analysis after separation from methyl hydroxylinoleates 147
Monosaccharides: TLC separation from oligosaccharides 250
Oils: In rapeseed, NMR spectrometry 9
Oligosaccharides: TLC separation from monosaccharides 250
Organic acids: Separation on Amberlite XAD copolymers by reversed phase high-pressure liquid chromatography 183
Palmitic acid: In amniotic fluid: determination for estimation of fetal lung maturity 90, 118, 264
Phosphate
Inorganic, ^{32}P-labeled, separation from rat liver homogenates 263
spectrophotometric determination in biological systems with crystal violet 166
Trace determination by thin-layer X-ray fluorescence 70
Phosphatidic acid: Cyclopentanoid analogs, synthesis and properties 207
Phosphatidyl *N,N*-dimethylaminoethanol: In rat liver, quantitation 37
Phosphatidylglycerol: Two-dimensional TLC for separation from derivatives 210
Phosphatidyl *N*-methyl aminoethanol: In rat liver, quantitation 37
Phosphatidyl serines: Brain, separation according to degree of unsaturation by TLC 119
Phosphoglycerides: Ethanolamine- and serine-containing, densitometric analysis 167
Phospholipids
Detection with spray reagent 208
Dry column chromatography 169
Ether, synthesis and properties 168,209
Serum, automated determination 121
determination without acid digestion 120

ENTRY NO.

Phosphorus: Determination in organic compounds 38
Phytosteroglycosides: Acetylated, high yield synthesis 173
Prostaglandin intermediates
tert-Butyl 3-hydroxy-5-oxo-1-cyclopentene heptanoate and its 3-deoxy-derivative, preparation 267
From norbornadiene, stereoselective synthesis 269
Prostaglandins
A, GLC profile 218
profiles obtained by GLC with multiple-ion detection 125
A_2, quantitative analysis from plasma using deuterated carrier and GLC–mass spectrometry 123
Antisera, production and characterization 212
Assays, limitations of 124
B, GLC profile 218
with multiple-ion detection 125
4(*R*)-( )- and 4(*S*)-( )-*t*-Butyldimethylsiloxycyclopent-2-en-1-one, synthesis 41
16,17-Configurationally-rigid-17-aryl-18,19,20-trinor-, synthesis and biological activity 74
(±)-11-Deoxy-, synthesis from 2-(*w*-hydroxyheptyl)cyclopent-2-enones 213
E; GLC profile 218
GLC profile with multiple-ion detection 125
peripheral plasma determinations in asthmatics 71
E_1; 10-aza, synthesis 270
phosphatidylethanolamide derivatives 216
radioimmunoassay in cell cultures 78
radioimmunoassay in unextracted plasma, serum, and myocardium 76
tetranor-, identification and assay in human urine 40
E_2; determination of 5-*trans*-prostaglandin-E_2 in, by high-pressure liquid chromatography of their *para*-nitrophenacyl esters on a silver ion-loaded cation exchange resin 77
phosphatidylethanolamide derivatives 216
radioimmunoassay in cell cultures 78
radioimmunoassay in unextracted plasma, serum, and myocardium 76
TLC separation from its pulmonary metabolites 219
Endoperoxide (PGH_2), 9,11-azo analogue, synthesis of 72
F_α, 13,14-dihydro-15-keto-, radioimmunoassay using iodinated tracers 268
F_1; GLC profile 218
GLC profile with multiple-ion detection 125
major metabolite of, quantitative determination in human urine by stable isotope dilution and GLC–mass spectrometry 122
$F_{1\alpha}$, radioimmunoassay in cell cultures 78
F_2; GLC profile 218
GLC profile with multiple-ion detection 125
major metabolite of, quantitative determination in human urine by stable isotope dilution and GLC–mass spectrometry 122

ENTRY NO.

$F_{2\alpha}$; (15*S*)-15-methyl-, measurement by radioimmunoassay 73
preparation of ^{14}C-labeled 16-aryloxy analogues (ICI 81,008 and 80,996) 79
radioimmunoassay in unextracted plasma, serum, and myocardium 76
TLC separation from its pulmonary metabolites 219
$F_{2\alpha}$ acetal, endoperoxidase mimic 217
2-(*w*-Hydroxyheptyl)cyclopent-2-enones, synthesis of (±)-11-deoxy-prostaglandins from 213
11-Nor-, total synthesis 75
And pulmonary metabolites, bioassay and TLC 214
Simultaneous separation of individual prostaglandins by TLC on an unmodified support 170
Synthesis of through allyl silanes 220
Thromboxane A_2, radioimmunoassay for with derived mono-*O*-methyl thromboxane B_2 215
Proteolipids: Isolation by single-phase butanol extraction 114
Resmethrin: BHT in, determination by high-pressure liquid chromatography 1
Retinol: Gel chromatographic separation from retinyl esters and other fat-soluble vitamins 15
all-*trans*-β-Retinoyl phosphate: Chemical synthesis 101
all-*trans*-α-Retinyl-11-^{3}H-acetate: Synthesis with high specific activity 238
Retinyl esters: Gel chromatographic separation from retinol and other fat-soluble vitamins 15
Rhodanine 6G: Use for spectrophotometric determination of fatty acids on potash salts 54
Seminolipid: In boar spermatazoa, micro-scale determination by high-pressure liquid chromatography 199
Sialic acids
Determination with thiobarbituric acid in dimethyl sulfoxide, application to de-*O*-acetylated 107
Fluorimetric assay 191
Fluorimetric thiobarbituric assay 26
Sodium dodecyl sulfate: Effect on lecithin-cholesterol acyltransferase in human plasma 48
Sphingosine long chain bases: Derivatives for GLC–mass spectrometry analysis 189
Stearic acid
And specifically deuterated derivatives, Raman studies of C–H and C–D stretching regions in 99
Spin-labeled, anchoring in lecithin multilayers, electron spin resonance study 115
Stearoyl paratoluenesulfonate: As acylating agent for lipid synthesis 96
Sterols
GLC–mass spectrometry; of corresponding 5α- and Δ4-3-ketosteroids 271
of trimethylsilyl ethers 271
6β-Halogenomethyl-19-norcholest-5(10)-en-

ENTRY NO.

3β-ol, radioactive, as adrenal scanning agent 273
Lano-, side-chain degradation by cleavage at (C-2)–(C-3) 175
Minor and trace, analysis in marine invertebrates 172
Sulfate determination: Enzyme electrode assay with immobilized arylsulfatase 25
Surfactants: Separation by combination of carrier electrophoresis and TLC 142,230
Thromboxane B_2: Total synthesis 266
Tocopherols
Quantitative determination, in oils and fats 144
Tissue, fluorimetric analysis 14
Trialkylglycerol ethers: Synthesis and properties with respect to application as noncaloric lipid compounds 154
Triglycerides
Addition to serum for quality control and reference 23
Distribution, rapid GLC determination 152

ENTRY NO.

In fats and oils, computer determination of all individual structures in molecules 244
Quantitative and qualitative chemical ionization mass spectrometry 188
Serum; enzymatic determination with centrifugal analyzer 24
fluorimetric estimation by modified Bucolo-David method 246
ultraviolet spectrometry by enzymatic method adapted to a centrifugal analyzer 247
Serum–plasma paired determinations with cholesterol 131
Violerythrin: Synthesis 51
Vitamin D
GLC 52
GLC, in multivitamin preparations containing excess vitamin E 10
Vitamin D_3
GLC in tuna liver and vitamin D_3 resin oils 11
1α-[2-^{3}H]Hydroxy-, synthesis 239
Vitamin K_5: Oxidation in aqueous solution, polarography 13
Waxes: Preparation using Ziegler method 223

Allan, R. N.	753	Karlin, J. B.	759

CHANGE IN PUBLICATION SCHEDULE AND SUBSCRIPTION RATES IN 1978

During the past 12 months there has been a considerable increase in the number of high quality papers submitted to the JOURNAL OF LIPID RESEARCH. This has resulted in an expanded Volume 18 for 1977, which contains over 100 more pages than Volume 17 in 1976. It is anticipated that this growth will continue into 1978. Therefore, in order to avoid a publication delay of submitted papers, a decision has been made to publish *two additional issues in 1978*. Subscribers will receive the customary six bi-monthly issues beginning in January plus extra issues in February and August.

A rate structure of $40 and $20 for institutional and personal subscribers, respectively, has been maintained for three successive years, 1975, 1976, and 1977. However, in order to meet the increased costs of publication of the two extra issues as well as to provide for inflationary rises, the subscription rates for Volume 19 (1978) will be increased to $70 per year for institutional subscribers and to $30 per year for those who pay for the Journal for their own use by personal check.
